

BROOME TECH TODAY

BINGHAMTON, N.Y. 13902

APRIL-MAY, 1971

Tuition Raised from \$400 to \$450 a Year

State Approves New Medical Record Offering

Broome Tech's curriculum in Medical Record Technology has been approved by the State University of New York.

Graduates of this program will be awarded the Associate in Applied Science degree and will be qualified to work in the medical record department of hospitals, clinics, nursing homes, schools of veterinary medicine or other health facilities.

Their duties can include compiling statistics, preparing studies for medical staffs, tabulating data from records for research, as well as checking records for accuracy and keeping records of the ever-growing number of patients.

A medical record is becoming more important in our society, as it is the permanent record of a person's illness or injury kept to preserve information of medical, scientific and legal value.

These records are needed to help doctors diagnose and treat future illness in a patient, to verify insurance claims, to plan hospitals, to inform the public health officials, and to aid researchers.

The Medical Record Technology curriculum at Broome Tech is a two-year program that includes 480 hours of directed practice in the medical record departments of cooperating hospitals in the community. These are Binghamton General, Wilson, Lourdes and Ideal Hospitals in the Triple Cities and Chenango Memorial Hospital in Norwich.

Alumni in Service

Michael Bozosi (LA-67) is an air Force second lieutenant and is stationed at Scott Air Force Base in Illinois. He also has his degree from Brockport.

Robert Zemanek (BT-63) is the public information officer for the 914 Tactical Airlift Group at Niagara Falls International Airport.

Timothy Bradley (CT-70) recently completed recruit training in the Marines at Parris Island.

Carl Kimes (LA-68) is at the Sheppard Air Force Base in Texas for training as a dental specialist after basic at Lackland AFB.

Springtime on the campus can be a lovely time, as this picture in front of the Library shows. See page 3.

Increase Takes Effect In September

The tuition at Broome Community College (new name starting in September) will be raised from \$400 to \$450 per year, beginning in the fall. The college Board of Trustees approved the increase at its April meeting.

This will be payable in three stages -- \$150 at the start of the fall term in September, \$150 at the start of the winter term in December, and \$150 at the start of the spring term in March.

Out-of-state residents will again have to pay double the tuition for those with New York State residency certificates. That means \$900 payable in the same three stages.

The raise is a modest one, as the ceiling on tuition at community colleges in New York State was lifted from \$400 to \$550 by action of the State University Board of Trustees this winter.

The Broome trustees, however, decided not to boost tuition over \$450. They desire to keep tuition as low as possible, but increases in costs made it necessary to add the \$50. The operating cost per student has gone up, and the state has placed a \$35 limit on the additional support it will give per student.

The \$450 tuition payment will cover about 30% of the cost of educating a full-time student for the 1971-72 college year. The balance is contributed by the state, the sponsor (Broome County) and other counties whose students attend the college.

Studies by the administration show that the additional \$50 per student will provide sufficient operational funds for the 30% share that comes from tuition.

The needier students will probably not be affected by the increase, because they will now qualify for additional Scholar Incentive Award money from the State. When the tuition was \$400, the Scholar Incentive Award limit was \$200. A \$450 tuition carries with it a new maximum of \$250. All students will not qualify for the (Continued on page 3)

23 Students Earn Straight 'A' 4.00 Grades

A total of 23 Broome Tech students earned straight 4.00 "A" averages for the recently concluded winter term.

Included in the group were Melvin Creeley, whose 4.00 was his third perfect term of A grades. Shirley Clark, Nancy Orlando and Joan Ostrowsky achieved 4.00 for the second term in succession.

Patricia Dolan had a string of three perfect 4.00 terms broken, when she got one B for a 3.94 average.

These 23 straight A students topped the President's List, which is an honor reserved for those whose averages are between 3.50 and 4.00. For this purpose, an "A" counts as 4.00, a "B" as 3.00, a "C" as 2.00 and a "D" as 1.00.

Tom Johnson, Gary Pendleton, Philip Colandro, Mary Matson and Miss Dolan made the President's List for the fifth time, which is all five terms that they have been at Broome Tech. John Kovach and Miss Orlando made the list for the fourth consecutive time.

The names of the students making the President's List appear elsewhere on this page, while the names of the 23 who achieved 4.00 averages are:

James Bankes, 1008 Catherine Ave., Endicott.

Debbie Barsham, 179 1/2 Bevier St., Binghamton.

William Campbell, 200 N. Harrison St., Johnson City.

Many Performing Arts Attractions on Campus

Plays, Films, Concerts, Art Show on Tap

While Broome Tech goes quietly about its primary business of education, the co-curricular program is creating a "show business" atmosphere on campus this spring. Three concerts, an evening of theater, an art exhibit and a series of fine movies are on the agenda.

The schedule includes:

- Jesus Christ Superstar, April 21
- Broome Tech Players, April 23, 24
- Spring Pops Concert, April 25
- Movies, April 27: Alice in Wonderland, The Red Balloon
- Kenny Rogers and the First Edition, May 2
- Fine and Familiar Arts Exhibition, May 9
- Movie: The Wrong Box, May 11
- Movie: Belle de Jour, May 18
- College Choir Concert, May 22

The movies are all part of the Broome Tech Film Society's spring series, and each is shown at 2:45 and 8 p.m. without charge. Open to the public, too.

All but the Pops Concert and Art Show are evening performances. The concert is at 3 p.m., the art exhibit from 2 to 5. They and the May choir concert are free.

Jesus Christ Superstar is a rock opera that has received some great reviews and has also been called blasphemous, as it deals with the last days of Jesus in modern language and music.

Broome Tech is one of the first college campuses to host the 25-member cast of the American Rock Opera Company. Tickets were sold out less than an hour after they went on sale.

The Broome Tech Players have selected a "deliciously kooky" play by George Bernard Shaw, "Passion, Poison and Petrification," and a serious drama by August Strindberg, "Miss Julie," for their April 23 and 24 presentations. Tickets are priced at \$1.50 and will be on sale at the door.

Kenny Rogers and the First Edition is one of the nation's top instrumental-singing groups, a versatile rock ensemble. All five of the group are former Christy Minstrels. This Sunday night concert climaxes Spring Weekend. Tickets are \$3.25.

...Tuition Raised

(Continued from page 1)

maximum.

This is the third time in four years that it has been necessary to raise the tuition at Broome C.C. After many years at \$300, it was increased to \$360 in 1967, to \$400 in 1968 and now to \$450 for 1971-72.

Springtime

Spring has been a long time coming this year, and its joys and pleasures were eagerly awaited on the Broome Tech campus, as elsewhere. These pictures, like the one on the first page, were taken last year and illustrate some of the things students like in the spring. The top picture here shows how students congregate on the patio in front of the Stu-

dent Center and enjoy the new-found warmth in the sunshine during free hours from class. The lower picture reveals how others spend their free time in the springtime — sitting in the sun on the hillside adjacent to the campus and tossing footballs or frisbees on the campus quadrangle in the background.

Lloyd Hartman

To Retire

After 25 Years

At Broome Tech

Retirement is a unique time in a man's life, and he faces it with mixed emotions, according to Lloyd Hartman, director of the Liberal Arts Division at Broome Tech who will retire at the end of the present college year in June.

"Mr. Hartman," as he has been known to thousands of Broome Tech students for 24 years, looks back fondly on his days at the college. And he is also looking ahead with pleasure, as he contemplates mornings without the alarm clock, afternoons without academic pressures, and evenings without worrying about the next day's classes.

He is 62 years old and has decided to take an early retirement after completing 25 years at Broome Tech and 37 years in teaching.

* * *

He and his wife Mim plan to continue living at 241 Meadowbrook Lane in Vestal, and they hope to do some traveling, especially to visit their two "Navy" sons. Roger is a lieutenant jg on a destroyer, and he is currently in Mayport, Fla., and Gary is a lieutenant commander in Washington, D.C.

Lloyd may also stay on as director of the choir at the Calvary United Methodist Church in Vestal, and he hopes to read all those books that he never had time to get around to.

Lloyd's Broome Tech days go back to November of 1946, when he left Binghamton Central High School to join the faculty at the New York State Institute of Applied Arts and Sciences at Binghamton. That name may sound strange to the younger alumni of the college and the younger people in the community. But that was Broome Tech's original name. It was known as State Tech in those days.

* * *

Lloyd admits that his colleagues at Central High School questioned his decision to leave the high school for the new two-year technical school. But Lloyd says he has never regretted the move.

"I don't claim to have had any idea in those days of how large the college would become or how

important two o-year community colleges would grow to be," he said the other day.

"But I wanted to get into college teaching, and this seemed like an excellent opportunity. It certainly developed into one."

Lloyd is also surprised, as he looks back, that the liberal arts program has become one of the college's largest. "We only had a few general education courses to fit into the technical curricula then," he said.

Highlights of a 25-year career are many, though difficult to recall on a moment's notice. But these are among the memorable recollections of his teaching career:

- Organizing the Liberal Arts curriculum at Broome Tech and seeing it grow to its present size of about 25% of the college's student body of over 2,000 students.

- The great acceptance at four-year colleges of credits earned by Liberal Arts students at Broome Tech, thus fulfilling the objectives of the curriculum. "We insisted on quality and performance from our students, and that policy has apparently paid off. Our decision to reject the many fads and educational experiments suggested to us through the years has proved a sound one."

- Having TV writer Rod Serling as one of his students at Central and watching him develop into a national celebrity. Their continuing warm relationship was demonstrated when Rod accommodated "his old teacher" by making a speaking appearance at Broome Tech without charge a few years ago.

- Hiring Dick Baldwin as an English instructor and basketball coach, traveling to Rochester with Roy Greenwood to get his man back in 1946. "I saw the college's first basketball game, and I've seen many of them since then, too."

- The fire that burned down the State Armory, when the college was located there, on Labor Day of 1951. "That was a low point, but a memorable one. We wondered if we had a college or a future -- or even a present. But we moved quickly into Kalurah

Lloyd Hartman

Temple and got classes going only two weeks later."

- The start of the Pre-Tech program about a dozen years ago and teaching English in it. This was an experiment that worked well and has developed today into the Collegiate Studies Certificate Program.

- Moving the college to the present campus. "That was some change after operating for years in the State Armory and then at Kalurah Temple in downtown Binghamton. The luxury of such spaciousness was a thrill at the time. Incidentally, we were the first community college in New York to have a campus and we all felt 12 feet tall moving up here."

- The many veterans the college had in the early days. "I had just come out of the service too, and so we had that in common. Having these older fellows in class also tended to emphasize the break from high school to college teaching. Their attitude and desire to learn was a fine example of how fellows can improve themselves if they work at it."

Lloyd could not complete 25 years at Broome Tech without a word of praise for Cecil C. Tyrrell

who has been the college president all that time.

"He has not only been a great leader for the college during all those years," Lloyd said, "but he has been one of the community's most dynamic leaders too. He has not only been a member of many community organizations, but he has actually worked for the organizations he joined, and he has also been president and leader of many of them."

"He has also been a fine man to work for. I believe the working conditions he has created for the faculty and staff here at Broome Tech have contributed much to the college's great success through the years."

"And people should make no mistake about Broome Tech's place of leadership in the community and in the nation. I know of many conversations with and letters from graduates and even faculty members, who were surprised to learn about the fine reputation Broome Tech has."

And for those interested in things like vital statistics, Lloyd was born in Great Bend, Pa., moved to Binghamton at the age of 4, and then attended Central High School. He earned his B.S. degree at Syracuse University and his M.A. at Cornell.

(Continued on page 8)

Job Interviews on Campus Draw 26 Firms

**18 Offer Posts
In \$6,000 to
\$8,200 Range**

A total of 26 companies sent employment recruiters to Broome Tech in March to interview seniors for jobs after graduation.

"Though this is a decline of seven companies from last year, it represents a good showing," according to Frederick W. Malloy, director of placement of the college.

"The current economic recession gripping the country has resulted in a sharp curtailment of recruiting activity by firms," Mr. Malloy said. "Some companies, in fact, told us they had canceled interviews this year at other two-year colleges; but they sent representatives to Broome Tech. And we also attracted seven companies for the first time this year," he pointed out.

The starting salaries were mostly in the \$8,200 to \$6,000 range, depending on the curriculum of the student, Mr. Malloy noted. Students interviewed were from the college's programs in accounting, marketing and secretarial; engineering technology in electrical, mechanical, civil and chemical; medical laboratory technology and engineering science.

Mr. Malloy also explained that 42 companies had originally signed up for interviews, but that 16 of them canceled just prior to or during the placement period. Some of these 16 said they still may have openings for applicants, but they decided not to send interviewers to the campus.

Although the job market is tight, Mr. Malloy said there are strong indications that graduates will be offered jobs by 18 of the 26 interviewing companies.

Service Fraternity On Campus

Sigma Epsilon Chi is a unique organization on the Broome Tech campus; it's the only fraternity.

It is a service fraternity, not a social one, and it has no affiliation with chapters at other campuses.

Dedicated to service to the college, the community and to itself, it was founded in the fall of 1967 by John Thompson, a liberal arts student.

It had seven members at the outset, was recognized by the Student Council in 1969, and has grown to 27 members this spring. It also has 27 alumni members and 18 honorary members -- those who were accepted into the fraternity but who did not graduate from the college for academic or other reasons.

Construction Work

Construction proceeds on the campus, as the sign along Front Street shows in the top picture. Picture at bottom shows the foundation being prepared for the addition at the north side of the Student Center which will add 55 feet to the width of the cafeteria. This addition should be ready for use in the fall.

Some of Sigma Epsilon Chi's projects are the blood drive conducted April 5 and 6 on campus, an American flag presented to the college for the flagpole in front of the Administration Building, and an ecology drive collecting old

newspapers and aluminum cans. The flag was presented to college president Cecil C. Tyrrell in honor of all Broome Tech students and graduates who have died in the service of the country. The flag presentation and last fall's blood

drive were inadvertently credited to other campus groups in the last issue of this Newsletter.

The fraternity also plans to sell flowers this spring -- both on and off campus -- to help raise money

(Continued on page 7)

Tennis Outlook Good; Baseball Promising

The outlook for Broome Tech's three spring sports teams is on the positive side, although it will be easier to tell after competition starts April 14.

The tennis team has the most talent returning, but it also has

the best record to live up to. Coach Oz Winters' tennis players were 10-0 in dual matches last year for the second straight season, and they won the regional title. They started this season with a 20-match winning streak.

Bruce Sims (15-0 last year in the region including the regional singles and doubles crown) is back along with Bill Thomas (14-1), Mike Nelson (14-1), Marty Gerchman (10-2) and Jim Stewart (10-1). That's a healthy start on an-

other winning campaign.

Larry Davis from Central is the most promising newcomer, as he has beaten all the veterans except Sims.

This is Winters' seventh season as tennis coach, and his Hornet teams have a combined record of 48 victories and 8 losses

Baseball coach Ed Daub has lost 10 players from last year's club that was 11-7-1. But he thinks well of his 1971 Hornets, as he cites a fine attitude and good hustle to go with what looks like a solid defense. "Pitching doesn't look bad," he added, "and we won't know about our hitting until we start to play."

Chuck Lasicki, Dave Brunton, Frank Nachman and Danny Fairchild look like the front line pitchers. Lasicki was 3-4 for last year's Hornets.

Other lettermen back include first baseman Russ Sanaeko, outfielder Tom Morris and third baseman Dale Traver.

Daub is high on freshman catcher Bill Smorol from the Section 3 champion Corcoran High School team in Syracuse.

Newcomers Tom Wasser from Central HS and Bob Havens from Catholic Central are set to man the important second base and short-stop posts, and the outfield battle is among freshman Gary Marion from Catholic Central and seniors Morris, Norm Curtis and Pat Hovancik.

Mark Shadduck may break into the infield or outfield or be a valuable utility man.

The golf team had a record high of 24 aspirants in spring tryouts. "It's too early to tell how good the boys are," said advisor Dick Baldwin, "but the interest is certainly high."

Fred Conte, Tom Kubisa and Ron George are returning lettermen from last year's team that was 9-5 and placed third in the regionals.

George averaged 81 strokes a round, which is very good for the medal play rounds that include no conceded putts and are often played in terrible spring conditions.

The promising newcomer list includes Bob Zareski from UE High School, Dave Kurty and Dave Krajcir from Central and John Polasek from Catholic Central.

Growth of Full-Time Student Enrollment

INSIDE BROOME TECH

Broome Tech President Cecil C. Tyrrell and Student Senate President Robert DiNunzio attended the recent inauguration of State University of New York Chancellor Ernest L. Boyer in Albany.

Although applications for admission are down in most of the nation's so-called prestige colleges, Broome Tech reports a 12.5% in-

crease for the fall of 1971.

The economic pressures are forcing many parents to look for less expensive public colleges, especially those close to home. Thus community colleges are attracting more applicants, while a college like Harvard is down 11%, Yale down 18%, Princeton 3% Ohio State and Wisconsin down 24%,

according to a recent Time Magazine article.

A. J. Kalbaugh, director of Broome Tech's Business Division, recently celebrated his birthday with a two-night hike over the Finger Lakes Trail. It was late last month, and he and his hiking partner encountered enough snow so that they had to use snow shoes part of the time, and they spent

their two nights camping in lean-to's along the trail. They walked from Route 228 near Lake Cayuta (correct) to Route 79 near Caroline

The April 5 and 6 blood drive on campus, co-sponsored by the Sigma Epsilon Chi service fraternity and the Dental Hygiene Society, resulted in 113 pints of blood being donated to the Red Cross.

Something Strange Happened

On the Way to the Tournament

Few sports fans in the Triple Cities don't know that Broome Tech's basketball Hornets were sifted out of the Region 3 Tournament in Buffalo last month, when they were snowbound overnight in Tully.

All-out efforts by coach Dick Baldwin to have the forfeit decision reversed were to no avail, and the Hornets were deprived of a chance to win their way into the National Tournament in Kansas.

But do you know, for example:

- That the snow was so high that when they dug Baldwin's car out the next day, they discovered snowmobile tracks over the car.

- That a man in a car about 300 yards up the road from Baldwin's was found dead the next day.

- That one of the reasons the Hornets did not leave the night before the game, when the snow started, was that exams were scheduled for many of the players the morning of the game.

Baldwin thought it better to have them take those exams then, instead of waiting until after they returned from the tournament.

- That the decision to have the Hornets forfeit the game for not being there on time was made in violation of National Junior College Athletic Association rules. It was made by the tournament director, who also happened to be the coach of Broome Tech's first-round opponent, Erie Community College.

NJCAA regulations specify that decisions of that nature should be made by the regional director, who just happened to be Dick Baldwin.

- That a coach from Montana flew to Buffalo to see Gerry Newby play because he had seen him in the national tournament last year, and he was impressed.

- That the ruling that kept the Hornets out of the regional tournament deprived their players of the opportunity to show their tal-

ents before four-year college coaches in the regional and perhaps the national.

- That Broome Tech's basketball team was suffering from some important injuries during the days of the tournament. Newby's ankles pained him again, and he did

not play in the unofficial playoff game against Monroe at the tournament site in Buffalo. Jim Brody had ulcer symptoms and he was below par in the playoff against Monroe. Fortunately, he did not develop an ulcer.

- That tournament director, Jack Fitzpatrick, said it was impossible to postpone the tournament games a day, because his school's gym was committed to some other group on Sunday.

"This seemed like a strange decision to be made by the man who criticized us for not leaving a day early, so we could be protected against such a contingency as the almost unprecedented snowstorm," commented Baldwin.

Despite the unsatisfactory finish, the season was quite a successful one for the Hornets. They ended up with 28 wins and four losses, were ranked No. 1 in the region, and had Newby make the second team Junior College All-America.

... Fraternity

(Continued from page 5)

for the American Cancer Society, which will be conducting the flower sale as a national fund-raiser.

Sigma Epsilon Chi sometimes works with other campus groups on its projects. The Dental Hygiene Society, for example, was a co-sponsor of the blood drive and will be of the flower sale.

The fraternity is self-supporting financially, receiving no money from the Student Senate. It raises funds through dues, social mixers, slave sales on campus and raffles. It even sponsored a Halloween Costume Contest last fall.

The officers this year are Roger Wells, president; Dan Reidy, vice-president; Robin Ferber, treasurer; Mike Skrepinski, secretary; and George Krupanski, sergeant at arms. Roger Marion is the faculty advisor.

GERRY NEWBY, who was named to the Junior College All-America second team as a climax to his basketball career at Broome Tech.

Broome Tech to Graduate About 800 June 11

Record Total To Hear Noted TV Newsmen

A record number of about 800 seniors is expected to be graduated from Broome Tech this year, and the commencement ceremonies are set for outdoors on June 11, a Friday night.

David Schoenbrun, award-winning TV commentator who is one of the few American journalists to visit Hanoi, is the speaker for the occasion. His topic is "Crossroads America," which will deal primarily with a consideration of domestic problems and solutions in America.

The 800 graduates constitute a 12% increase over last year's total of 715, as the college continues to grow each year. Consider, for example, that this is more than double the number of graduates as recently as 1965, when associate degrees were bestowed upon 392 seniors.

The increase is also up sharply from only two years ago, when the Class of 1969 consisted of 597 graduates. That's a 34% jump.

Included in this year's commencement will be degree-recipients from two of the college's newest curricula -- police science and medical record technology. About 60 graduates will be receiving their degrees through the college's evening program -- a record high as this path to earning the degree continues to grow too.

The commencement will start at 6:30 p.m. and it will again be held on the College Quadrangle, weather permitting. The gymnasium will be available on a stand-by basis.

Mr. Schoenbrun is currently a senior lecturer at Columbia University's Graduate School of International Affairs. He is, therefore, a serious scholar who at the same time possesses the hard-driving aggressiveness of a capable news reporter, a keen sense of analysis and a good sense of humor.

He is believed to be the only

David Schoenbrun . . . graduation speaker. The former prize-winning TV commentator, author and journalist is now a senior lecturer at Columbia University's Graduate School of International Affairs.

news correspondent to win major awards in every medium of communication. These include best radio reporting from abroad in 1953, best TV reporting from abroad in 1955, best book of 1957 ("As France Goes"), best magazine article of the year in 1959 and best commentator of the year in 1960.

He will be remembered by many for his CBS programs "David Schoenbrun Reporting" and "Your Man in Paris."

Darwin R. Wales, chairman of the Broome Tech Board of Trustees, will preside at the commencement exercises, and college president Cecil C. Tyrrell will also deliver a few remarks.

. . . Hartman

(Continued from page 4)

His teaching experience included two years at Cazenovia Junior College, one year at Brewster High School in Brewster, N.Y., and nine at Binghamton Central before moving to Broome Tech. His 26 months in the Navy came while he was at Central.

About the Alumni

Two liberal arts graduates of the Class of 1970 will leave in June to study at the University of the Andes in Colombia, South America. They are *Anne Samchalk* and *Santa Militello*, both of whom transferred to State University at Binghamton.

Gerald Turecek (MT-57) has been promoted to development engineer and manager of mechanical support and engineering at IBM Owego.

Karl McConnell (ET-62) was recently named a performance engineer in the fossil power generation department of Babcock & Wilcox in Barberton, Ohio. He is also a 1968 graduate of the University of Akron. He and his wife live in Norton, Ohio.

Douglas Gerhardt (BT-69) works in the corporate tax department of the Sun Oil Co. in Philadelphia. He is an associate tax accountant. He is also working toward his baccalaureate degree in business administration at Drexel.

Richard Randles (PE-65) received his M.S. in statistics at the University of Rochester.

Lynette Marean (BT-68) has been appointed assistant registrar at Ithaca College.

Gary Scherer (BT-63) is the assistant manager of the Chamber of Commerce in Port Arthur, Texas.

Richard Clouthier (CH-63) has received his B.S. in chemistry at Harpur, and he works for Xerox in Binghamton as a sales representative. His wife Jill, incidentally, is a 1963 Broome Tech graduate in dental hygiene.

Chris Newton (MO-65) played the lead earlier this month in the Civic Theater's performance of "Philadelphia Story." She did well. She was known as Chris Gaul when at Broome Tech.
